

APRIL TARGETED CONSULTATION UPDATE

Heathrow Community Noise Forum

22 January 2020

Heathrow

PROJECT UPDATE

- Following Airport Expansion Consultation (AEC) Heathrow has made some changes to the expansion proposals, as well as continuing to develop design and assessment information.
- Some of these changes are material and need to be taken back to the public for consultation, whilst some of them are updates to the AEC proposals.
- We will run a targeted consultation to seek feedback on these material changes, updates and additional information - proposed between 15 April and 11 June 2020 (8 weeks).
- An updated Statement of Community Consultation is currently with host local authorities to seek feedback on our proposed approach to the targeted consultation.

PROJECT UPDATE

- Targeted consultation documents will be fewer in number than AEC, reflecting the targeted scope. Currently proposed to cover:
 - Changes to our masterplan and forecasts
 - Construction update
 - Mitigation and compensation update
 - Surface access update
 - Property policies update
 - Apprenticeship update
- We expect to make our application for development consent in Q4 2020.
